Summary

Data Scientist with extensive experience in machine learning model development and deployment, pipeline automation, and translating complex data into actionable insights. Skilled in leveraging cloud platforms (AWS) and programming languages (Python, SQL) to build scalable solutions. Proven ability to drive product innovation through data visualization, sensor data analysis, and cross-functional collaboration. Seeking to contribute to a team that values curiosity, ownership, and depth.

Skills

- **Machine Learning:** Supervised & Unsupervised Learning, Time Series Analysis, Model Development & Deployment
- **Cloud Platforms:** AWS (Glue, SageMaker, S3, RDS), Pipeline Automation, Infrastructure-as-Code Concepts
- **Programming:** Python, SQL, Bash/CLI, Pandas, Data Visualization (Matplotlib, Seaborn, Tableau)
- **Tools & Libraries:** NumPy, Scikit-learn, TensorFlow, PyTorch, SciPy, spaCy, NLTK
- **Data Engineering:** ETL, Data Quality Pipelines, Big Data Processing
- **Collaboration:** Cross-Functional Teams, Technical Communication, Product Development
- **Environments:** Linux, MacOS, Windows

Work Experience

Colosimo Enterprises

Jun 2022 - Present

Data Science & Independent Research

Buffalo, NY (Remote)

- Built LyrIQs, an NLP project analyzing rap lyrics (lexical diversity, readability, rhyme density, syntactic complexity) with publicationstyle visuals and reproducible notebooks
- Developed a Nürburgring laptime model: cleaned & enriched vehicle specs (e.g., power/weight, wheelbase), engineered features, trained regressions, and assessed feature importance
- Initiated the development of a personal website and data science portfolio, integrating technical writing and project showcases, which established an online presence and supported early brand-building efforts

mIQroTech Inc.

May 2021 - May 2022

Lead Data Scientist

Tampa, FL

- Designed, deployed, and scaled ML models for oil pipeline anomaly detection, improving accuracy by 15%.
- Automated AWS-based ETL pipelines, reducing processing time by 30% and manual labor by 50%.
- Built Python-based dashboards to visualize real-time sensor data, aiding decision-making across teams.
- Led sensor hardware upgrades, significantly enhancing data acquisition capabilities and improving data quality for analysis

Men's Wearhouse

Aug 2019 - May 2021

Wardrobe Consultant

Tampa, FL

- Assisted clients in professional wardrobe planning, enhancing active listening and customer empathy skills
- Maintained top customer satisfaction scores and sales performance in a high-pressure retail environment.
- Balanced the role with early data science upskilling by exploring projects and ideating part-time contracts, enhancing skills in spaCy and ETL processes

mIQroTech Inc.

Jan 2018 - Jul 2019

Data Scientist

Tampa, FL

- Developed computational models for IoT sensors, contributing to patent-winning technologies.
- Led proof-of-concept trials and data validation using regression analysis, driving product enhancements and ensuring data accuracy
- Collaborated with hardware teams to improve data reliability, preventing costly product recalls.

- Authored technical documentation for stakeholders, using clear language to bridge knowledge gaps and facilitate better understanding of product features

Pennsylvania State University

Aug 2015 - May 2017

Teaching Assistant

University Park, PA

- Led lab instruction and tutoring for 120+ students per semester in data analysis and chemistry.
- Raised average student exam scores by 3% through custom learning tools.

Selected Projects

IoT Anomaly Detection

mIQroTech, Inc.

- Built ML model on time-series sensor data; reduced false positives by 20%.

Sensor Data QA Pipeline

mIQroTech, Inc.

- Developed automated QA checks, improving usable data volume by 15%.

Python Dashboard Suite

mIQroTech, Inc.

- Created dashboards for real-time analytics, halving reporting workload.

Achievements

- **US Patent 11,719,390 B2:**Apparatus, system, and method for determining a location
- **US Patent 11,808,692 B2:**Apparatus, system, and method for sensing corrosion of a member
- **Magellan Scholarship Research Grant:**USC Aiken, funded in the amount of \$5,000
- **Graduate Student Teaching Award:**Penn State University, funded in the amount of \$4,000

Education

Pennsylvania State University - University Park

May 2015 - Jul 2017

Ph.D. Program (Incomplete), Computational Chemistry

University Park, PA

- **Achievements:** Graduate Student Teaching Award
- **Coursework:** Quantum Chemistry I, Quantum Chemistry II, Solid State Physics, Statistical Mechanics, Symmetry & Spectroscopy

University of South Carolina - Aiken

Aug 2011 - May 2015

B.S., Chemistry

Aiken, SC

- **Achievements:** Chemistry Student of the Year, Magellan Scholarship Research Grant
- **Coursework:** Linear Algebra, Calculus I, Calculus II, Multivariate Calculus, Differential Equations
