Dominick Colosimo

Data Scientist | Transforming Data into Impactful Insights and
Patented Technologies
Buffalo, New York, United States

Summary

Data Scientist driving innovation with machine learning and patented sensor technologies. At mlQroTech, I developed and scaled ML models that improved anomaly detection by over 15% and reduced data processing times by roughly 30%. Passionate about leveraging data to solve complex industrial challenges, I bring expertise in Python (NumPy, Pandas, scikit-learn), AWS (Glue, SageMaker, S3, RDS), data pipelines, and data visualization to create impactful solutions. Lead author on two patents for sensor technology. I'm seeking a data scientist role where I can apply my skills to drive product innovation and deliver measurable results.

Experience

Seeking New Opportunities in Data Science

Data Scientist | Driving Innovation Through Data | Seeking New Challenges
May 2022 - Present (4 years 3 months)

mlQroTech

Lead Data Scientist
May 2021 - May 2022 (1 year 1 month)
Tampa, Florida, United States

- Developed and scaled machine learning models to optimize pipeline monitoring, reducing anomaly detection time and increasing overall model accuracy by over 15%.
- Automated end-to-end data pipelines using AWS Glue and SageMaker, reducing data processing times by roughly 30% and cutting manual workload by 50%.
- Created an in-house Python visualization suite to track and monitor real-time sensor data, facilitating a data-driven decision-making process across engineering and sales teams.
- Led initiatives to enhance sensor data quality by advocating for upgraded hardware, improving overall data acquisition rates by over 200%.

mlQroTech

Data Scientist

January 2018 - July 2019 (1 year 7 months)

State College, Pennsylvania, United States

- Designed computational models to support sensor and IoT systems for pipeline monitoring, contributing to the development of patented technologies.
- Conducted proof-of-concept studies and led experimental trials, providing quantitative evidence to validate system effectiveness and leading to successful product launches.
- Advocated for hardware and data acquisition improvements that enhanced sensor capability, directly improving data integrity, preventing a recall of a full batch of devices
- Collaborated with sales and engineering to create technical reference documents, facilitating understanding of complex systems for non-technical stakeholders.

Penn State University

Teaching Assistant

August 2015 - May 2017 (1 year 10 months)

State College, Pennsylvania, United States

- Led problem-solving sessions and laboratory experiments for 120+ students per semester, fostering a deeper understanding of chemistry, data analysis, and effective communication.
- Developed instructional materials and increased average student exam scores by 3% through one-on-one tutoring and technical workshops.

Education

Penn State University

Theoretical Chemistry · (2015 - 2017)

University of South Carolina-Aiken

Bachelor of Science - BS, Chemistry · (2011 - 2015)
